DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7, 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims depend on canceled claims and as such are indefinite. Further it appears claim 7 should depend from claim 3 since this claim introduces the second carrier.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 8 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by German reference 41002.

Note figure 7 of the reference where 5 and 1 could be connected if the extension carrier were removed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 7, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newman in view of German reference 41002 as applied and for the reasons set forth in the first Office action mailed 09/14/06.

Applicant's argument has been carefully considered but is not deemed persuasive in view of the German reference, particularly figure 7 which shows an extension carrier. Note claim 7 is treated as if it depended from claim 1 since claim was incorporated into claim 1.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over German reference 41002 or Newell in view of the comments set forth in the paragraph rejecting claims 5 and 6 in the Office action mailed 09/14/06.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over the German reference 41002 or Newell in view of Isom et al. as applied and for the reasons set forth in the Office action mailed 09/14/06.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3652

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
